EDUCATION

MIT World Peace University

Bachelor of Technology in Computer Science and Engineering; CGPA: 7.6/10

Pune, Maharashtra, India

August 2022 – May 2026

EXPERIENCE

IoT and Cloud Intern

Shalaka Connected Devices LLP | Internship Certificate

5 Jan 2026 – 4 Jul 2026

Pune, Maharashtra, India

- Contributed to IoT telemetry data analysis, cloud deployment workflows, and dashboard development for the company's IoT and cloud-connected product lines.
- Built cloud-hosted services and full-stack data pipelines bridging physical device telemetry with cloud-based systems, applying full-stack development, containerized deployments, and data engineering practices.
- Analyzed device data streams to derive actionable insights, supporting product readiness through reliable ingestion-to-visualization data flows.
- Supported deployment pipelines and cloud portal development, integrating data visualization components using React and Flask.

CERTIFICATIONS

Tata Group Data Analytics Job Simulation

Forage

January 2026

- Completed AI-powered data analytics simulation for a Financial Services team, conducting exploratory data analysis using GenAI tools to assess data quality and identify risk indicators.
- Proposed a no-code predictive modeling framework for customer delinquency risk assessment and designed an AI-driven collections strategy incorporating ethical AI and regulatory compliance principles.

Tata Data Visualisation: Empowering Business with Effective Insights

Forage

February 2025

- Created data visualizations for Tata Consultancy Services senior leadership, preparing strategic questions and designing visual analytics to support executive decision-making.

PROJECTS

Travel Recommendation System | Python, Flask, React, PostgreSQL, Docker

June 2025 – August 2025

- Architected and developed a full-stack, containerized web application using Docker for seamless deployment and scalability.
- Built a Flask backend providing a robust REST API and a React frontend for a dynamic user interface.
- Engineered a CNN-based image recognition feature using OpenCV for travel recommendations from photos, achieving 92% accuracy in identifying key landmarks.

Malware Detection System | Python, Machine Learning

January 2025 – April 2025

- Developed a malware detection engine using static file analysis in Python, achieving 85% detection accuracy across sample datasets.
- Implemented a robust method for early threat identification through pattern recognition and feature extraction.

Tourism Analysis | Python, Pandas, Data Engineering

August 2024 – October 2024

- Developed a comprehensive data engineering framework analyzing over 10,000 tourism datasets to uncover key trends.
- Enhanced management strategies and informed decision-making for local tourist attractions through data-driven insights.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, JavaScript, SQL, HTML/CSS

ML & AI: TensorFlow, PyTorch, Scikit-learn, OpenCV, Pandas, NumPy, Matplotlib, Seaborn, Generative AI

Frameworks & Libraries: Flask, FastAPI, React, Node.js, REST APIs

Databases & Data Engineering: MySQL, MongoDB, PostgreSQL, ETL Pipelines, Data Wrangling, Statistical Analysis

Cloud & DevOps: Google Cloud Platform, Docker, Git, CI/CD

Developer Tools: VS Code, PyCharm, IntelliJ, Eclipse, Visual Studio

Core Competencies: Predictive Modeling, Anomaly Detection, IoT Analytics, Data Visualization, Full-Stack Development
