EDUCATION

MIT World Peace University <i>Bachelor of Technology in Computer Science and Engineering; CGPA: 7.5/10</i>	Pune, Maharashtra, India August 2022 – May 2026
--	--

EXPERIENCE

AI/ML & Data Engineering Intern <i>Shalaka Connected Devices</i> - Developed and evaluated machine learning models on diverse IoT datasets, implementing performance reporting and model versioning pipelines using Python, TensorFlow, and PyTorch. - Analyzed large-scale IoT telemetry data streams to derive actionable insights and implemented anomaly detection algorithms for industrial applications, improving system reliability. - Managed end-to-end data engineering lifecycle including collection, cleaning, labeling, and synthetic dataset generation for ML model training. - Designed UI/UX wireframes and supported backend implementation for cloud portal development, integrating data visualization components using React and Flask. - Built full-stack data pipelines bridging physical device telemetry with cloud-based AI systems, ensuring reliable data ingestion using PostgreSQL.. - Maintained comprehensive technical documentation including model evaluation results and system architecture notes to support scalable production deployments.	January 2026 – Present Pune, Maharashtra, India
--	--

CERTIFICATIONS

Tata Group Data Analytics Job Simulation on Forage - Completed AI-powered data analytics simulation for Financial Services team, conducting exploratory data analysis using GenAI tools to assess data quality and identify risk indicators. - Proposed no-code predictive modeling framework for customer delinquency risk assessment, leveraging GenAI for structured model logic and evaluation criteria. - Designed AI-driven collections strategy with agentic AI and automation, incorporating ethical AI principles and regulatory compliance frameworks.	January 2026
Tata Data Visualisation: Empowering Business with Effective Insights on Forage Created data visualizations for Tata Consultancy Services senior leadership, preparing strategic questions and designing visual analytics to support executive decision-making.	February 2025

PROJECTS

Travel Recommendation System <i>Python, Flask, React, PostgreSQL, Docker</i> - Architected and developed a full-stack, containerized web application using Docker for seamless deployment and scalability. - Built Flask backend providing robust REST API and React frontend for dynamic user interface. - Engineered CNN-based image recognition feature using OpenCV for travel recommendations from photos, achieving 92% accuracy in identifying key landmarks.	June 2025 – August 2025
Malware Detection System <i>Python, Machine Learning</i> - Developed malware detection engine using static file analysis in Python, achieving 85% detection accuracy across sample datasets. - Implemented robust method for early threat identification through pattern recognition and feature extraction.	January 2025 – April 2025
Tourism Analysis <i>Python, Pandas, Data Engineering</i> - Developed comprehensive data engineering framework analyzing over 10,000 tourism datasets to uncover key trends. - Enhanced management strategies and informed decision-making for local tourist attractions through data-driven insights.	August 2024 – October 2024

TECHNICAL SKILLS

Programming Languages: Python, C/C++, Java, JavaScript, SQL, HTML/CSS
Machine Learning & AI: TensorFlow, PyTorch, Scikit-learn, OpenCV, Pandas, NumPy, Matplotlib, Seaborn, Generative AI
Frameworks & Libraries: Flask, FastAPI, React, Node.js, REST APIs
Databases & Data Engineering: MySQL, MongoDB, PostgreSQL, ETL Pipelines, Data Wrangling, Statistical Analysis
Cloud & DevOps: Google Cloud Platform, Docker, Git, CI/CD
Developer Tools: VS Code, PyCharm, IntelliJ, Eclipse, Visual Studio
Core Competencies: Predictive Modeling, Anomaly Detection, IoT Analytics, Data Visualization, Full-Stack Development
